Contents:

1. Introduction to OFDM

Introduction	1.1
Review of Single Carrier Systems	1.2
Frequency Selective Fading	1.3
Effect of Frequency Selection I	1.4
The Multi-carrier Approach	1.5
Effect of Frequency Selection II	1.6
Problems with Multi-Carrier	1.7
OFDM Modulation I	1.8
Serial to Parallel Conversion	1.9
What's Orthogonal about OFDM?	1.10
Inverse Discrete Fourier Transform	1.11
The IDFT in OFDM	1.12
Discrete Fourier Transform	1.13
Cyclic Prefix I	1.14
Cyclic Prefix II	1.15
Cyclic Prefix III	1.16
Windowing I	1.17
Windowing II	1.18
Oversampling	1.19
OFDM versus DMT	1.20
OFDM advantages	1.21
OFDM Flexibility: Variable data load I	1.22
OFDM Flexibility: Variable data load II	1.23
OFDM disadvantages	1.24
OFDM loss of orthogonality	1.25
Signal Power Variations	1.26
Peak Power	1.27
Peak to Average Power Ratio	1.28
Crest Factor	1.29
High PAR Disadvantages	1.30
PAR of OFDM Signal	1.31
PAR Reduction	1.32
PAR Reduction: Clipping	1.33
PAR Reduction: Peak Windowing	1.34
PAR Reduction: Peak Cancellation	1.35
PAR Reduction: Peak cancellation II	1.36
PAR Reduction: PAR Reduction Codes	1.37
PAR Reduction: Scrambling	1.38
Selective Scrambling	1.39
Selective Scrambling II	1.40
Selective Scrambling III	1.41
Selective Scrambling IV	1.42
Selective Scrambling V	1.43
Selective Scrambling VI	1.44
Selective Scrambling VII	1.45
Selective Scrambling summary	1.46
Channel coding for OFDM	1.47
Error correction	1.48

Examples of error correction	1.49
Interleaving for OFDM	1.50
Interleaving for OFDM II	1.51
Interleaving for OFDM III	1.52
PAPR reduction error correction coding	1.53
PAPR reduction coding II	1.54
PAPR reduction coding II	1.55
PAPR reduction coding III	1.56
PAPR reduction coding IV	1.57
PAPR reduction coding V	1.58
PAPR reduction coding VI	1.59
PAPR reduction coding VII	1.60

2. OFDM Synchronisation

OFDM Synchronisation	2.1
OFDM Transmitter Structure	2.2
Complex Representation of OFDM Symbol	2.3
OFDM Receiver Structure	2.4
Sensitivity to a Timing Offset I	2.5
Sensitivity to a Timing Offset II	2.6
Sensitivity to Frequency Impairments	2.7
Sensitivity to Frequency Offsets	2.8
Sampling Clock Frequency I	2.9
Sampling Clock Frequency II	2.10
OFDM Symbol Synchronisation I	2.11
OFDM Symbol Synchronisation II	2.12
Frequency Synchronisation I	2.13
Frequency Synchronisation II	2.14
Phase / Amplitude Recovery	2.15
Channel Estimation	2.16
Pilots in Packet Transmission Systems	2.17
Channel Estimation using the Preamble	2.18
Phase Tracking	2.19
Continuous Transmission Systems	2.20
Pilot Spacing in Frequency and Time	2.21
Interpolation	2.22
802.11a/g Synchronisation	2.23
Synchronisation using Pilot Symbols	2.24

3. OFDMA

Introduction	3.1
OFDMA	3.2
OFDMA vs MC-CDMA I	3.3
OFDMA vs MC-CDMA II	3.4
Multicarrier CDMA	3.5
MC-CDMA I	3.6
MC-CDMA II	3.7

Contents:

Multicarrier DS-CDMA	3.8	Maximum Likelihood Channel Est.	5.16
MT-CDMA	3.9	Correlative Channel Sounding	5.17
Frequency Hopping OFDMA	3.10	MSE Channel Estimation	5.18
FH-OFDMA: Advantages	3.11	Conclusions	5.19

4. Equalisation

Data Transmission	4.1
Transmission of Digital Data	4.2
Channel Distortion	4.3
Transmission Error	4.4
Adaptive Channel Equalization	4.5
Adaptive Channel Equalisation	4.6
FIR Equaliser Decision Directed Mode	4.7
Blind equalisation	4.8
Decision Directed Mode (DDM)	4.9
Constant Modulus Algorithm (Godard)	4.10
Sato Algorithm	4.11
Benveniste-Goursat Algorithm	4.12
Stop-and-Go Algorithm	4.13
Decision Feedback Equaliser (DFE)	4.14
Redrawing the DFE Training Mode	4.15
Decision Feedback Equaliser - DDM	4.16
FF-DFE Training Mode	4.17
FF-DFE Decision Directed Mode	4.18
Fractionally spaced equalisers (FSE)	4.19
Baud spaced equaliser operation	4.20
Baud spaced equaliser output	4.21
Fractionally spaced equaliser operation	4.22
Fractionally spaced equaliser output	4.23
Equaliser convergence	4.24

5. Channel Estimation

Introduction	5.1
Channel Estimation I	5.2
Channel Estimation II	5.3
Channel Estimation Techniques I	5.4
Training Ch. Estim.: Disadvantages I	5.5
Training Ch. Estim.: Disadvantages II	5.6
Training Based Ch. Estim.: Advantages	5.7
Blind Channel Estimation: Pros. and Cons.	5.8
Training Sequence Location	5.9
Tracking Techniques	5.10
Adaptive Channel Tracking	5.11
Channel Estimation Architectures	5.12
Iterative Channel Estimation I	5.13
Iterative Channel Estimation II	5.14
Channel Estimation Algorithms	5.15

6. EVM

Contents	6.1
Error Vector Magnitude	6.2
Error Vector Magnitude defined	6.3
Phase Noise	6.4
Phase Noise Example	6.5
Phase Noise and EVM	6.6
Phase Noise and EVM II	6.7
Small Angle Approximation	6.8
Small Angle Approximation II	6.9
Magnitude Error vs Phase Error	6.10
Phase Error vs Time	6.11
Constellation Diagram I	6.12
Constellation Diagram II	6.13
Constellation Diagram III	6.14
Constellation Diagram III	6.15
Vector Display I	6.16
Vector Display II	6.17
Vector Display III	6.18
Filtering and EVM	6.19
EVM vs Time I	6.20
EVM vs Time II	6.21
Error Spectrum	6.22
Conclusions	6.23

7. Maximum Likelihood Carrier Phase and Timing Estimation

A-Priori Probability Density Function	7.1
Model of Received Signal	7.2
The Likelihood Function	7.3
ML Phase Estimation	7.4
ML Timing Estimation	7.5

8. Synchronisation

Contents	8.1
Signal Model	8.2
The Synchronisation Problem	8.3
Symbol Timing	8.4
Effect of Symbol Timing Errors (I)	8.5
Effect of Symbol Timing Errors (II)	8.6

Contents:

802.15.3a Task Group	12.4
UWB Definition	12.5
UWB Pulses	12.6
Pulse Bandwidth	12.7
Pulse Train	12.8
Time Hopping	12.9
Modulation I	12.10
Modulation II	12.11
Modulation III	12.12
Channel Capacity	12.13
Power Spectral Density	12.14
Transmission	12.15
Spectral Mask	12.16
Receiver	12.17
Direct-Sequence UWB	12.18
Direct-Sequence UWB	12.19
Multi-Band UWB	12.20
MB-UWB Spectrum	12.21
Multi-Band OFDM	12.22
Applications	12.23
Wireless USB	12.24
Cognitive Radio Concept	12.25
